spectrum (i.e., their reflectance).

Papermaking - Paper properties and uses | Britannica

Paper is a common material most often used for writing, drawing or printing. Like all materials, paper has thermal properties. Thermal properties are defined as the properties of a material

Online Library Properties Of Paper Tu E

relating to how the particular material responds to heat, how easily heat passes through the material and what changes occur within the material as a result of exposure to heat.

Thermal Properties of Paper | Sciencing

PFA or Perfluoroalkoxy has very similar

Online Library Properties Of Paper Tu E

properties to PTFE in that it is very chemically resistant, flexible and thermally stable (with continuous use up to 260 degrees C), but while PTFE does have some tendency to creep, PFA is creep resistant and is excellent for melt-processing, injection moulding, extrusion, compression moulding, blow moulding, and transfer moulding.
